= alcatuirea de noduri

```
struct nod
{
    int info;
    struct nod* urm;
};
```

```
#include <stdio.h>

struct nod
{
    int info;
    struct nod* urm;
};

int main()
{
    struct nod *p = (struct nod*)malloc(sizeof(struct nod));
    p -> info = 10;
    printf("%d ", p->info);

    /// adaugare element urmator si afisare folosind nodul p

    struct nod *q = (struct nod*)malloc(sizeof(struct nod));
    q -> info = 20;
    p -> urm = q;
    printf("%d\n", p -> urm -> info);

    system("pause");
    return 0;
}
```
